

Pandey, Datta (5th Floor)
A.I.I.M.S. HOSPITAL

Subject : Private Ward booking / registration

Patient's Name : Arin

Treating Faculty : Dr. Jayant P. Shinde

Department : _____

• • • • •

Dear Sir / Madam,

Ref. advice / recommendation of your treating faculty regarding private ward inpatient hospitalization. It is informed that your name has been booked/ registered for admission on

that your name has been booked. Every effort will be made to admit you on the given date. However, albeit rarely, at times due to circumstances beyond control, it may not be possible to allot you the private ward on given date. In that case, you will be accommodated at the earliest possible.

Payment can be deposited by Cash/Debit or Credit Card / Demand Draft for Rs. 33,000/- or Rs. 88,000/- (for B Class / A Class room respectively) in favour of Director, AIIMS, New Delhi towards room rent advance of 10 days & hospitalization charges on the given date and please contact telephonically at Tel. No. 26594708 for getting the admission slip from Room No. 6A, M.S. Office, AIIMS Hospital between 12:30 p.m. to 1:00 p.m. The patient may not come personally and instead an attendant can come to obtain the admission slip. The patient may be brought within 4 hours of getting admission slip & completing admission formalities.

Thanking you,

revised from 1991. 2nd ed.

A Class - Rs. 63000/- for 10 days

P.S. to Medical Supdt.

Guidelines for Screening & Registration

1. SRs posted in screening OPD should review referral papers and take a joint decision regarding appropriate referral to clinic /OPD of IRCH.
2. Completely worked-up patients can be referred directly to specific organ /specialty based clinic and the remaining patients can be registered in respective OPD.
3. Patients referred directly to specific departments /clinics/faculty should be referred to respective department/clinic/faculty.
4. If there is a need, patient can be referred to specific OPD/ Clinic of main AIIMS.

Disclaimer : You have been screened in the Cancer Screening OPD and have been referred to the treating unit for registration and treatment appointments. The registration and treatment appointment will be given depending on the slot availability, as slots are restricted due to COVID-19. As cancer requires timely treatment and waiting may have adverse effect on patient's disease; patient is suggested/advised to explore treatment options at other AIIMS/ Regional Cancer Centre/State Medical Colleges and other Govt. Cancer facilities, in case there is delay in availability of slots at Dr. BRA IRCH.

HISTOPATHOLOGY REPORT

MICROSCOPIC EXAMINATION:

Received one paraffin embedded tissue block for review labelled as excisional cervical lymph node (LL 1565 L/24).

Microscopy: Section examined shows diffuse effacement of lymphoid architecture by polymorphous population of cells comprising of lymphocytes, histiocytes and scattered atypical/ HRS cells.

Immunohistochemistry: HRS cells are immunopositive for CD20 (dim, variable), CD15, CD30, PAX-5 (weak) and EBV-LMP1 while negative for CD3. CD3 highlights background reactive T lymphoid cells.

Impression: Classical Hodgkin lymphoma, Mixed cellularity type

DIAGNOSIS:

S2506177A

Block for review

Cervical lymph node

• Hodgkin lymphoma mixed cellularity NOS 9652/3

End Report

Reporting Resident: Dr. Yashika Maheshwari

Reporting Faculty: Dr. Saumyaranjan Mallick

Reporting Date/Time: 07-02-2025 13:10

Disclaimer :

1. This report is electronically generated and does not require a signature or stamp to be considered valid.
2. The pathology diagnosis is to be interpreted by the treating physician in conjunction with clinical features, imaging, and other investigations.

KING GEORGE'S MEDICAL UNIVERSITY
UTTAR PRADESH, LUCKNOW
DEPARTMENT OF NUCLEAR MEDICINE

Baseline

Patient ID: 20240392606	NM Reg: PET/251/08/2024
Name: Nitin Kumar	Age/Gender: 7/M
Ref. By: Pediatrics	Study date: 31/08/24

WHOLE BODY (18F-FDG) PET-CT SCAN

CLINICAL HISTORY: k/C/O HODGKINS LYPHOMA. No H/O CT/RT/surgery
Indication: Disease status

PROCEDURE: 3.0mCi of 18F-FDG was administered intravenously. To allow for distribution and uptake of radiotracer, the patient was allowed to rest quietly for period of 60-90 minutes in a shielded room. CT acquisition was obtained for attenuation correction and anatomic localization followed by PET acquisition in 3D mode. The study was acquired from the level of vertex to mid-thigh. Semiquantitative analysis of FDG uptake was calculated by SUV value expressed in lean body mass (lbm).

Contrast used IV contrast: 20 ml

Blood sugar at the time of FDG injection: 78 mg/dl

PET/CT findings:

Physiological uptake of radiotracer is noted in the visualized brain parenchyma, tonsillar region, vocal cords, myocardium, gut, pelvicalyceal system and urinary bladder.

BRAIN:

Normal physiological tracer distribution noted in the brain parenchyma. No focal lesion or abnormal uptake noted in the brain.

(NOTE: If there is strong suspicion of brain metastasis or primary brain malignancy, then MRI is recommended for further evaluation because small lesions may not be detected on FDG PET/CT due to high normal physiological uptake.)

**KING GEORGE'S MEDICAL UNIVERSITY
UTTAR PRADESH, LUCKNOW
DEPARTMENT OF NUCLEAR MEDICINE**

MUSCULOSKELETAL SYSTEM:

Diffuse FDG avidity(SUVmax-3.0) is noted in visualised axial and appendicular system-bone marrow activation.

Physiologic FDG distribution is seen in the rest of visualized axial and appendicular skeleton.

IMPRESSION: PET-CT scan reveals:

- Metabolically active cervical lymphadenopathy consistent of Lymphoproliferative disorder.
- Hyper metabolism in parapharyngeal tonsils-disease involvement.
- Hepatosplenomegaly.

Note: suggested for interim FDG PET/CT. ✓
